

UX SOLUTIONS

STRONG PERFORMANCE. SIMPLE INTEGRATION.

**UNATTENDED PAYMENT SOLUTIONS
FOR SELF-SERVICE ENVIRONMENTS.**

verifone.com

Verifone®

INNOVATIVE DESIGN. DEPENDABLE DELIVERY.

Verifone UX Solutions is a portfolio of modular payment components that are designed to create secure, fast and reliable, interactive self-service sales installations – quickly and easily.

We've brought together card and contactless readers, screens and PIN pads into a single portfolio that uses advanced power and energy management, remote connectivity and interactive platforms to deliver new levels of performance – whatever your market.

Verifone UX Solutions operate at temperatures between -20°C to +70°C, are approved to IP65/IP35 and are IK09 vandal proof. They are also PCI PTS 3.0 and SRED certified and provide DK, CE, UL, UKCC (UK Cards Association) and FCC security as well as delivering the fastest start-up, from low power, of any unattended payment devices on the market.

UX 100 PIN PAD WITH DISPLAY

2.5" monochrome graphic display (128x64) incorporates a new heater unit that ensure slow temperature running.

UX 110 PIN PAD

Ergonomic keypad with large, laser etched and contoured text keys minimises data input errors. The UX110 can be used in a secure manner with a 3rd party screen allowing a single user interface for kiosk users.

UX 300 CARD READER

A standard bill acceptor cut-out, card identifier and shutter mechanism improve the experience and reduce misuse.

UX 400 CONTACTLESS READER

Use to upgrade existing and new unattended equipment for contactless card, NFC and mobile payments. Features an illuminated contactless logo for easy identification at the POS.

WIDER REACH. GREATER SCOPE.

Our unattended solutions help you find new ways to extend your reach, boost throughput or simply to cope in busy, remote or challenging environments.

Demand for faster, easier and more economical ways to accept payments for all types of goods and services continues to rise. UX Solutions offers you the flexibility and performance you need to take your sales points further – whatever your market, location or user demographic.

OUR UX SOLUTIONS HELP MERCHANTS AND INTEGRATORS TRANSFORM THEIR UNATTENDED MARKETS BY ENABLING:

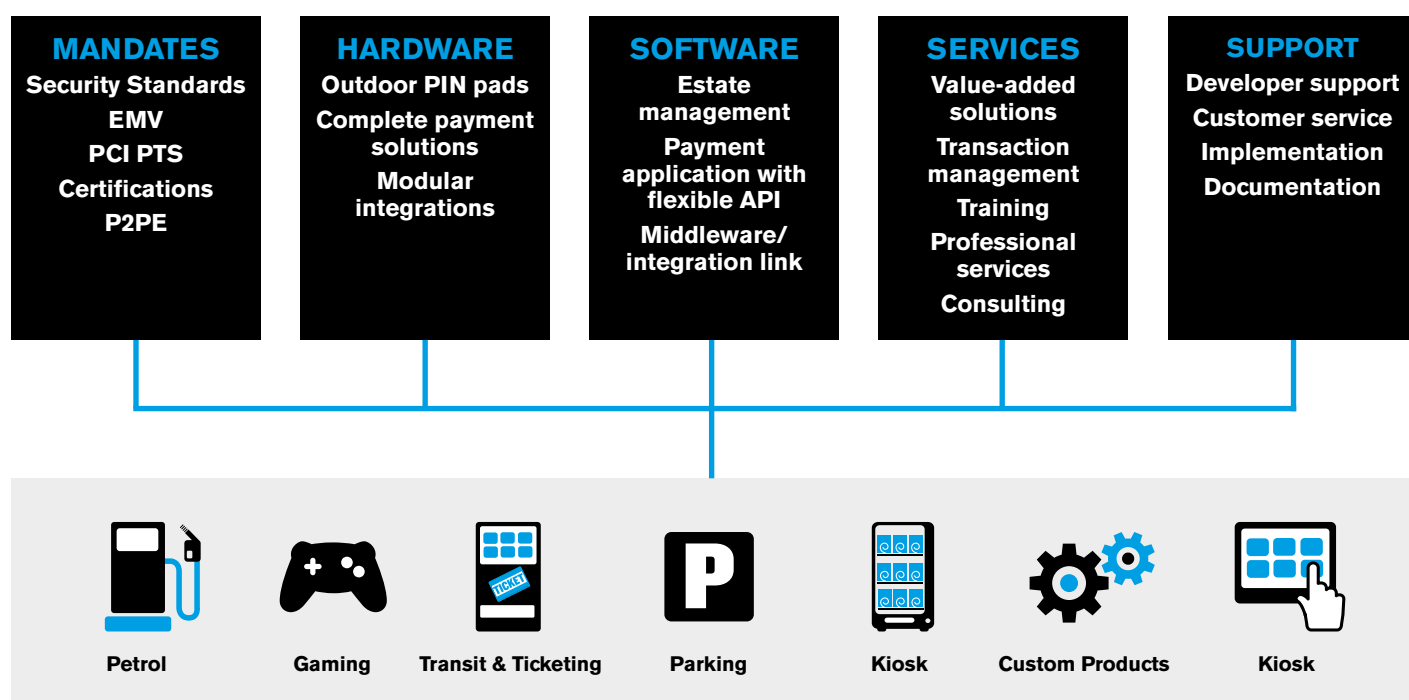

- Next generation services and applications
- Wider acceptance for contactless/NFC and mobile payments
- New energy saving features such as fast wake/sleep functions
- Open loop payment for one stop purchasing of multiple services
- Wider reach and applications through secure, robust and better connected devices.

SINGLE SOURCE. CONNECTED SYSTEMS.

Verifone offers more than just payment terminals,
to create a complete payment system that's right for you.

Our UX Solutions can be combined with enterprise software and managed payment services for building and maintaining a secure card acceptance infrastructure, in addition to flexible application development capabilities and tools for integration of value-adds such as loyalty and multimedia management.

ORIGINAL THINKING. OUTSTANDING RESULTS.

We have designed our UX Solution components from the ground up. Focusing on client-driven, practical innovation to develop features that ensure greater benefits to merchants, integrators and end users.

EASIER INTEGRATION

Built-in processor and controller functionality allows card readers to be installed as a single unit making integration faster, easier and more cost-effective.

GREATER DURABILITY

A resilient maintenance-free design includes metal top plates and keypads which are tested to withstand over 2 million presses. The card reader also incorporates a drain mechanism and underside mounted connections to prevent damage from moisture/water.

FASTER PROCESSING

UX Solutions offer the fastest start-up, from low power, of any unattended payment device on the market. Acceptance can be achieved in 2-10 seconds, which is up to 300% faster than many other unattended devices.

ENERGY EFFICIENCY

A sleep mode with ultra-fast start up helps conserve energy while battery usage has been improved by 33%.

EASE OF USE

LED 'traffic lights' on the card and contactless readers provide clear guidance on the transaction status. A large and embossed card symbol on the UX Solution card reader slot helps avoid misplaced cards while an illuminated contactless logo on the card reader lets users know that the machine accepts tap and pay. Verifone's high contrast displays are also more readable in daylight conditions including direct sunlight.

Verifone has over 30 years of experience in terminal solutions, payments as a service and commerce enablement. We want to help you solve your payments challenge.
